STRONG LOCATION
STRONG PARTNERS
HALL 5. BOOTH 1129
This year, the Breakbulk Europe will take place in Bremen for the first time. I am sure that all attendees will be highly satisfied with this choice of venue. Bremen is a city on the River Weser with an attractive historic setting. Hotels, exhibition grounds and city centre are all close to one another – and even the airport is within easy reach. In a nutshell: we are ideally prepared for your visit.

There is another reason that makes Bremen the ideal place to host this important trade fair. The city of Bremen is still a major seaport, the southernmost in Germany. And it is exactly non-containerized, heavy lift cargo that accounts for a major share of the goods handled here. In other words: Bremen is Breakbulk City.

I wish all attendees a successful time at the fair and hope that you will also have the opportunity to enjoy our beautiful Hanseatic city.

I extend a warm welcome on behalf of the Senate of Bremen.

Sincerely,

Martin Günther
Senator for Economic Affairs, Labour and Ports

On behalf of bremenports, the port management company, I extend a warm welcome to the Breakbulk 2018 in Bremen. Together with the trade fair organizers, Messe Bremen, and Bremen marketing and tourist service, BTZ, we have made every effort to provide the best possible organizational conditions for the event.

The trade fair is an excellent opportunity for us to show the many thousands of visitors Bremen’s dynamic profile as a port location. Automobile- and container-handling are concentrated in Bremerhaven, 60 kilometres further north. Heavy and ultra-heavy cargo that cannot be packed in a container is the most important goods category for the harbours in the city of Bremen. Neustädter Hafen and Bremerhaven, Germany’s southernmost seaport and one of the largest terminals in Europe for breakbulk and heavy lift, play a central role now and in future. Throughput figures were up significantly last year; a clear sign that the Hanseatic city will remain an integral part of the ports of Bremen.

Bremen boasts excellent infrastructure for handling cargo of all kinds. We are an integral part of the European inland navigation network and the hinterland, connecting the free trade zones, ports and airports. Together, we provide the ideal conditions for efficient and fast loading and unloading of goods. In Bremen, a joint stand is organized by bremenports, to gain a feeling impression of the commitment, diversity and expertise of our local business enterprises. We are sure that you will make the most of this opportunity to do so. These companies, in turn, look forward to seeing you.

The Breakbulk Europe is an ideal match for the maritime profile of the Federal Land of Bremen and the surrounding region. By hosting this fair successfully, we also wish to demonstrate that you will find ideal conditions in Bremen for future events. On behalf of bremenports, I wish you interesting days at the Breakbulk, successful business and lasting impressions.

Sincerely,

Robert Howe
Managing Director bremenports

Bremen: the ideal place for the Breakbulk Europe
We make your risks visible.

Our family-run company of insurance brokers has been there for you since 1837. The identification and handling of your risks is a challenge we face day in, day out, and the comprehensive experience and expertise we have garnered over many years ensure we find the right solution for you every time. Whether you operate nationally or internationally, we provide tailored assistance and are there when you need us the most.

From a risk assessment and analysis of your existing risk protection to the compilation and implementation of a cover concept right through to support in the event of loss. Our international network means you can be sure you will always have an expert partner by your side, wherever you are. Our teams work closely and dynamically with you as true partners and we are proud to embrace and uphold the mercantile maritime tradition.

ATS LOGISTICS

Wherever your heavy lift or breakbulk cargo is going, trust ATS International Projects Europe to get it there safe & on-time.

Headquartered in Bremen, Germany, our European division will create a plan with the services you need, all on a single bill of lading.

Operating as an NVOCC, we offer a wide assortment of options tailored to meet your specific transportation needs, including specialized, over-dimensional, and heavy haul cargoes. Let our experience, financial stability, and uncompromised reputation for personalized customer care provide the international transportation solution that’s right for you.

The Battermann + Tillery Group is a leading provider of marine and cargo surveying as well as loss prevention and consulting services. We have been family-owned and operated since the company’s establishment in 1913.

Our German operations with 21 offices and more than 100 in-house experts as well as subsidiaries in other European countries and our international network of surveyors make us one of the largest surveying companies in Europe.

Battermann + Tillery

In recent years, we have vastly expanded our Loss Prevention Unit, particularly in the area of loading surveys of heavy lift shipments, offering highly qualified comprehensive service for break bulk shipments all over Germany and the Benelux Ports. The service provided by our dedicated Team of 10 specialized staff members includes assessment and rating calculation of cargo securing equipment, loading sketches, consulting and warranty surveys.

Battermann + Tillery
Furthermore, we offer innovative transport, handling, and storage solutions for the offshore wind industry. Services include baseport, nearshore, and production logistics. Our sites boasts excellent infrastructure and specialized equipment that customers can use wherever they need it. We use purpose-built vehicles such as pontoon or self-propelled modular transporters (SPMT), providing the right logistics solutions for heavy cargo weighing up to 4,800 tons.

One of Europe’s leading port facilities, the BLG ro-ro terminal in Bremerhaven handled 1.35 million tons of high & heavy cargo in 2017. More than 1,400 liner vessels with 180 destinations worldwide called at Bremerhaven last year.

Bremerhaven – more than just a port

The new komplett industrial park in the south of Bremerhaven specialises in the production and pre-assembly of large-scale industrial plant and thereby on the banks of the river and the public heavy-lift quay. Benefit from the permanent ap-proval for pre-defined transport units. There are already attractive industrial sites in the north of this city in the immediate vicinity of the container terminal and port facilities.

Heavy lift cargo? We make light work of it!

- Vacant sites and properties for production, logistics and storage
- Heavy-lift deep-sea quay
- 121 hectares of net area available in the south, 53.5 hectares in the north
- Unrestricted 24/7 operations
The ports in the city of Bremen specialise in handling conventional and heavy lift cargo, including project cargo, steel products, pipes and timber products. There are a number of highly specialised companies, sufficient crane capacities to cope with demand as well as extensive operating and storage areas. The ports also handle classic bulk goods such as ores, coal, grain, refined petroleum products, building materials as well as food, beverages and tobacco. Numerous logistics centres and Germany’s leading freight village, the GVZ, are all located here.

Neustädter Hafen on the left bank of the River Weser and Industriehafen on the right bank play a central role for general cargo and heavy lift. Together with the high and heavy facilities in Bremerhaven, they handled more than 4 million tons of breakbulk last year, making these three harbours in the Federal Land of Bremen one of the leading port locations in Europe.
Carl Ungewitter Trinidad Lake Asphalt is a traditional forwarding company and was founded in 1878.

Tradition and progress - this is our creed!
The daily business includes all kinds of shipments by Sea and Air worldwide.

Carl Ungewitter has its own set up at Libya and was the first registered International Freight Forwarding Company in the country. With an experience of more than 35 years within the Libyan Oil sector we are able to handle all kinds of project cargo and have the knowledge of special regulations.

Our Job is your success.

CHS CONTAINER GROUP

Your partner worldwide
For forty years, we have been creating and designing mobile solutions for our customers. From a standard sea container to tailor-made solutions for our customers. From a standard sea container to tailor-made solutions to transportation spe-
cial containers. Our containers are the flexible and quick answer for any project or task. Our teams are the experts in per-
sonal, professional and customer-oriented solutions.

CHS Container Group provides services at any port in the world and has its own depots in 50 countries.

Our portfolio at a glance:
Wood packaging materials
Boxes – crates – transport saddles – pallets
Export packaging
Produced to IPE Standard for sea transport, air freight, truck transport
Storage facilities
50,000 m² outdoor and covered storage area

Sawn timber
Squared timber – slats – boards – planks – packaging timber

Engineered wood
Plywood, OSB, hardboard, chipboard
Cut-to-size panels

The packaging professionals: we produce custom-
made crates in any size or shape as well as export packaging for land, air or sea transport in solid wood or wood materials such as plywood and OSB. We manufacture to IPE Standard and satisfy the requirements of ISO 9001 / JAS/.

D. Heinrichs Stauereibetrieb

D. Heinrichs Stauereibetrieb, or D. Heinrichs Stevedoring Company – the name itself immediately conjures the sea: stevedoring means stowing the cargo properly on board a vessel. This stevedoring company, which was founded more than 184 years ago, was the first step in the present Heinrichs Group, which now consists of several stevedoring companies and a staff of around 400.

The Heinrichs Group provides services at the port facilities of Bremerhaven, Bremerhaven, Hamburg, and Hamelin, and also at other ports in northern Ger-
many if required.

The key business areas are cargo handling and the steering of the stevedoring and the logistics. The stevedoring is augmented by the provision of a comprehensive logistics services. The Group also deals with the container sector, with three firms in Bremerhaven and Hamburg ensuring professional container stuffing and stripping on their own premises.

The service portfolio of the Heinrichs Group ranges from handling general cargo to container handling, heavy lift, project cargo, containers and dangerous goods, loading and discharging vessels infre-

cargo vessels, stowing and stripping containers of all kinds, goods inspection, repacking, hiring container transport using the Group’s own vehicles and goods storage right through to customs declarations. The Heinrichs Group is a full-service provider and works hand in hand with shipping companies, freight forwarders and industry.

Roughly 70,000 jobs in the Federal Land of Bremen are dependent on the port industry – which means that the interests of this business sector also play a key role in the political scene. The Port Promotion Agency - Bremische Hafenvertretung BHV e.V. – and the Association of Small and Medium-Sized Business Enterprises at the Ports in Bremen City, or ISH, are two institutions which have proved to be highly effective representatives on behalf of their members.

The ISH now represents 50 small and medium-sized enterprises from the maritime business that act on a local, national or global scale. In line with their motto “ZUKUNFT HAFEN.DE” (The future of our ports), the ISH members provide a platform for constructive dialogue in Bremen. We are delighted that you have decided to visit us and look forward to interesting discussions with you.

Roughly every fifth job in the Federal Land of Bremen is dependent on the ports of Bremen according to a recent survey, which identified 77,250 jobs in the Federal Land of Bremen as port-dependent. This means that the number of jobs related to the ports has increased even further over the last few years. It also means that Bremen’s economy has a far greater maritime focus than in Hamburg, for instance, where every ninth job is dependent on the ports.

Martin Günthner, Bremen’s Senator for the Ports, regards these figures as proof of the outstanding importance of the port facilities in Bremen and Bremerhaven: “The ports are both the heart and the driving force of Bremen’s economy. For the Senate, it is therefore a clear obligation to continue to invest in refurbishment of the infrastructure in Bremen and Bremerhaven. At the start of this year, a new railway station was inaugurated in Bremerhaven to optimise rail operations at the terminal. The new port tunnel, which will provide a direct link between Bremerhaven Container Terminal and the motorway, will be completed shortly. A one-kilometre long new quay in water construction at the container terminal is in response to the steady growth in passenger shipping. And finally, the nautical conditions of Bremen’s harbours have been improved by deepening and widening the harbour basins. This safeguards the position of the maritime logistics centre of Bremen/Bremerhaven as one of the most important universal ports in Europe.”

**BREMEN’S SPORT BUSINESS – A STRONG PARTNER**

BHV has around 250 member companies from the logistics, port and transport sectors, most of which are based in Bremen and Bremerhaven. The object of the Port Promotion Agency is to publicize the interests of its members and thus raise the image of this sector with politicians, the business community and society in general. To do so, BHV organises events such as monthly evening lectures at the “Hafenclub” in Bremen Town Hall and other themed events.

**PORTS ARE BOTH THE HEART AND THE DRIVING FORCE OF BREMEN’S ECONOMY**

BHV operates around 500 member companies from the logistics, port and transport sectors, most of which are based in Bremen and Bremerhaven. The object of the Port Promotion Agency is to publicize the interests of its members and thus raise the image of this sector with politicians, the business community and society in general. To do so, BHV organises events such as monthly evening lectures at the “Hafenclub” in Bremen Town Hall and other themed events.
HANSA MEYER GLOBAL HOLDING

Hansa Meyer Global
Transport Architects for more than 30 years

Since its foundation in 1988, our company has expanded from its initial core business - global shipments of capital goods for the machinery and power industry (Projects Division) - into integrated transport architects.

In the course of internationalization, we have expanded our global network over the recent decades to 20 local operations at the most strategic venues of the world. Furthermore we established the business units Airfreight Division, ProLog Innovation and the US-Heavy Haul & Rigging Division. Around 230 colleagues worldwide are the backbone of the company. They share their profound knowledge of the local infrastructure, market conditions and customs procedures with our customers.

We are on hand to assist you with our many years of experience and commitment to the field of import-export. With our partners on all seven continents of the world, we guarantee the standard of service you require, ensuring expertise in all logistical fields.

HBH LOGISTICS

HBH Logistics GmbH & Co. KG was established in April 2006. Since then, it has sought to expand the international market in the field of customer-oriented logistics. At HBH Logistics GmbH & Co. KG we continuously expand our global services and improving these with your support.

We owe the success of our young company to the commitment and motivation of our employees. Our expertise, flexibility and innovation provide the three cornerstones for your logistical success.

600 long trains arrive at the ports in Bremen and Bremerhaven every single week – ample proof of the outstanding role that this port group plays as Europe's leading railway port. Nowhere else is rail's share of the modal split as high as it is here. The terminal railway in the Federal Land of Bre- men has a track length of more than 200 kilome- tres. Every second container handled at the ports is transported on rail. When it comes to automo- bile transport, rail accounts for an even higher share: roughly 80 per cent of the 2.3 million cars that are handled in Bremerhaven every year arrive at or leave the port via rail. The systematic development of the rail facilities ensures that the ports of Bremen are ready to cope with the growing number of freight trains and can offer ad- ditional capacities on the market.

EXCELLENT CONNECTIONS
SEKO LOGISTICS

SEKO started out in business in 1976, operating out of a single Chicago office. Since then, we have built a solid reputation throughout the world as an innovative and flexible provider of first-class logistics services.

We provide complete Supply Chain Solutions, specializing in transportation, logistics, forwarding and warehousing. We also lead the industry with innovative and customizable IT solutions, which provide a seamless flow of information and give our growing customer base true supply chain visibility.

The Share Shipping - Share Logistics group offers expert support for shipping oversized and heavy equipment.

Our specialists will evaluate potential risks, analyze shipping routes and solutions and send you a competitive quotation for a successful outcome. No matter the challenge, we will find a solution.

PTS LOGISTICS

The PTS Logistics Group provides customer-specific logistics and fulfillment services in packing, transport and storage. With some 190 employees and numerous locations, the PTS Logistics Group stands for quality, flexibility and innovation, and offers packaging for everything from tiny components to large-scale plants, consultancy services from the design phase to the construction phase and the full range of performances that make modern works and storage logistics in combination with efficient road transport.

The PTS Logistics GmbH, founded in 1989, stands for quality, flexibility and innovation, and offers packaging for everything from tiny components to large-scale plants, consultancy services from the design phase to the construction phase and the full range of performances that make modern works and storage logistics in combination with efficient road transport.

With over 120 offices in 40 countries worldwide, our unique shareholder management model enables you to benefit from global implementation experience and expertise across all industry sectors, coupled with vital in-country knowledge and service at the local level.

SHARE SHIPPING AGENCY

The Share Shipping - Share Logistics group offers expert support for shipping oversized and heavy equipment.

Our specialists will evaluate potential risks, analyze shipping routes and solutions and send you a competitive quotation for a successful outcome. No matter the challenge, we will find a solution.

W & F FRANKE SCHWER-LAST INTERNATIONALE SPEDITION

W & F Franke is the leading company for heavy-duty transport in northern Germany, open and closed standard trailers complete our fleet of special trucks. With more than 100 well-trained employees and an updated truck pool, we accept the challenge of special transports for more than 25 years.

Too long? Too high? Too wide? Too heavy? We cope with every task. With the most modern technique, with sound knowledge and high adherence to schedules we transport nearly every heavy lift cargo to the desired destination across Germany and Europe. Due to permanent information exchange with our customers and implementation of training courses our transport technology is always up-to-date. Because expertise is the most important success factor. So that your valuable goods arrive securely at their destination.

Bremeninvest: your key to Germany
We help you grow your business.

The city of Bremen and the port of Bremerhaven together make up the federal state of Bremen. We, the people of Bremen, have a long tradition of combining trade, commerce and innovation. With expertise in everything from maritime services, logistics and microchip engineering to wind energy and automotive, our economy is strong and fit for the future.

We specialise in meeting the needs of international customers and offer a one-stop support service for your business requirements. You can expect a team that works hard on your behalf, a fast decision-making process and a single point of contact who will efficiently coordinate all aspects of your case. If you are establishing a subsidiary, a branch office or an international start-up, we will provide advice and support every step of the way. We can help you find the right premises, tell you about regional, federal and EU funding opportunities and help you with the official approval processes. Contact our team to find out more about Bremen as an investment location, about your funding options and about the services provided by Bremeninvest.

Bremenports – the port managers

34 kilometres of piers, 200 kilometres of terminal railway, 1465 kilometres of quays and more than 50 bridges and 22 kilometres of dykes – the infrastructure of the ports of Bremen is extensive and complex. Professional maintenance of all these different elements is one of the key tasks of the port management company Bremenports. In addition to the infrastructure, Bremenports is also responsible for the comprehensive projects for new structures and buildings at the ports, attends to award-winning nature conservation projects as substitute sites for port construction work and attends worldwide trade fairs and events for customers as a port marketing specialist on behalf of Bremen’s ports.

Bremenports is also the mastermind behind the greenports strategy, which has established sustainability as part and parcel of the company’s day-to-day activities. Work-life balance plays in the working world of the 70 Bremenports employees and the company’s Career, health and family policy has won national certification as exemplary.
